Re: 99P-1340/CP 1
Petition to Have "Eternity eau de parfum" Misbranded

I fully support this petition. I sometimes get headaches when I am around scents and there are occasionally other symptoms as well with the worst being an inability to form coherent thoughts. You may laugh at that but it's very scary to me when it happens. I don't know what the chemicals are that cause these reactions but believe that products like Eternity that have chemicals in them that are untested should, at the very least, be labeled appropriately per FDA guidelines. It is my sincere hope that the FDA will act to protect consumers in the near future.

Sincerely,

Sean Brient
